

3M™ Respirator Cleaning Wipes 504

Technical Data Sheet

Description

3M™ 504 Respirator Cleaning Wipes are designed to clean the surface dirt and deposits from a used half or full face respirator or other respirator type surfaces e.g. PAPR blowers and PAPR headtop/hoods. When a respirator has been used for a brief period or has remained relatively clean during extended use, the 504 Wipes are an easy, convenient way to wipe off the surfaces and prepare the respirator for storage and use on the next occasion it is needed.

Features

- Pre-moistened towelettes
- Uses Benzalkonium Chloride - a quaternary ammonium compound as a sanitiser.
- 100 wipes/box

Limitation

- The 504 wipes are an ideal interim cleaning method however they should not replace a thorough cleaning process as part of regular care and maintenance of the respirator.
- Do not clean any elastomeric respirator with solvents. Cleaning with solvents may degrade some respirator components and reduce respirator effectiveness.
