MSA Clear and Clean

Mini Towels

Product Description

Pre - Moistened lens cleaning towel in sealed foil pack, designed to clean lenses on prescription spectacles, safety eyewear, goggles, faceshields and other protective lenses such as respirator full face masks, air hoods etc.

Clear and Clean Mini Towels are anti-static. The exclusive formula cleans, clears and provides resistance to fogging.

The towels can also be used to clean personal protective equipment such as full and half face respirators, earmuffs etc. The product is also useful for general cleaning and disinfecting telephones, computers screens and keyboards.

Principles of Operation

Supplied in a self dispensing hang pack of 100 towels.

Designed for wall mounting.

The towel is simply removed from the foil pack, wiped over the eyewear lens or other objects and polished until a clean and clear finish is obtained.

It is safe to discard the towel in normal rubbish disposal systems.

A product MSDS is available on request
